

Lab 6 - Mini-Project

Objective:

- working at the project

Solutions for the proposed JS exercises, by [Maria Dascalu](#):

- [Pizzeria](#)
- 1211E: [HEX Colours](#)
- 1212E: [Captcha](#)

ANNOUNCEMENT " **Nested lists** often form the basis for website navigation menus, as they are a good way to define the hierarchical structure of the website." (

http://www.w3.org/wiki/HTML_lists#Nesting_lists)

So, they are important!

- http://www.w3schools.com/html/tryit.asp?filename=tryhtml_lists2
- http://www.w3schools.com/html/tryit.asp?filename=tryhtml_nestedlists2

If you try to validate a nested list which is incorrectly written, but, upon you, it works, on <http://validator.w3.org/>, you have the following output:

[invalid_markup_validation_of_upload__form_submission_-_w3c_markup_validator.pdf](#)

All the projects which will be evaluated by [Maria Dascalu](#) will be checked on <http://validator.w3.org> and, even if they "work", but they have errors, they will be graded accordingly (-2 points from the final grade).
