Exercise

- Divide in teams of maximum 5 (maximum 6 teams), with GroupMaker from <https://www.superteachertools.us/>
- Consider the following educational scenario:
 - You have a class of 60 students and they have to divide in groups of 3-5 students. Each group has to implement a project during the whole semester. No more than 2 groups can have the same project subject. You have to monitor also their progress (they have to schedule for periodic meetings), to offer feedback and, in the end, to evaluate all of them and let them learn one from others' mistakes or best practices.
- Brainstorm about how you can successfully implement the above educational scenario with the aid of technologies: plan the activities and what tools you could use for each activity (tip: use the Toolbox)
- Put your ideas in the digital form with <https://www.mindmeister.com/>.
- Send an email with the sharable link of your mindmap to elisabeth.lazarou@upb.ro, maria.dascalu@upb.ro.
- [Optional] Share it on Facebook, on EXTEND group page <https://www.facebook.com/groups/1694200834031369/> or to your personal page, mentioning (in both cases) the EXTEND Facebook page <https://www.facebook.com/KA2EXTEND/>
- Present your solution to your colleagues in the form of a gallery-walk
